

Caitlin M. Cusack, MD, MPH

Partners Healthcare System

Center for Information Technology Leadership

Dr. Cusack is a senior analyst for the Center for Information Technology Leadership (CITL) and is an Instructor in Medicine at Harvard Medical School. Dr. Cusack, a board certified Obstetrician Gynecologist, having completed her residency at Case Western Reserve University. She left clinical practice in order to obtain a master's in public health from the Harvard School of Public Health, focusing on patient safety and healthcare information technology. She began her post-clinical career at Cerner Corporation where she participated in the development of a women's health module for their EHR. Dr. Cusack then became a health care consultant at Booz Allen Hamilton, participating in HIT consulting activities, including leading the Canada Health Infoway project on a ten year investment strategy for a pan-Canadian EHR. Currently at the Center for IT Leadership, she is the lead on their most recent major project, the Value of Provider-to-Provider Telehealth Technologies. In addition she leads the Value and Evaluation team for the Agency for Healthcare Research and Quality's National Resource Center for Health IT, developing tools to assist the HIT community in evaluating their healthcare IT projects.
