

Eric Pan, MD, MS

Partners Healthcare System

Center for Information Technology Leadership

Dr. Pan is a CITL senior analyst who researches healthcare information technology and develops value modeling and projections and is an instructor in medicine at Harvard Medical School. He is also an internist and involved in training informatics fellows at Harvard/MIT as adjunct faculty for the Children's Hospital Informatics Program (CHIP). Prior to joining CITL, Dr. Pan completed a National Library of Medicine Medical Informatics fellowship at the Children's Hospital Informatics Program and a master's in informatics degree at Harvard/MIT. His research focuses on patient privacy and confidentiality, healthcare information system security, and patient-controlled electronic medical record systems.
