

**Glenn G. Hammack, OD, MSHI, FAAO**  
Assistant Vice President and Executive Director  
Electronic Health Network  
University of Texas Medical Branch at Galveston

Dr. Glenn Hammack became assistant vice president and executive director of the newly named UTMB Electronic Health Network in December of 2004. In this position he has overall authority for planning, design, implementation, and maintenance of the UTMB Electronic Health Network through the establishment of standards, procedures, and policies in order to provide affordable, high-quality care over distances.

In addition, he has been given the responsibility to develop and sustain the next generation of telehealth/electronic medicine at UTMB, executive management of a large-scale operational telemedicine, telehealth, and remote physician services organization: 70 FTE, \$8.5M budget, 60,000 remote provider-patient encounters annually and executive management of the \$1M grant-funded AT&T (formerly SBC) Center for Telehealth Research and Policy at UTMB (outcomes research, publications, conference, policy support and development, media, publications, and communications).

Hammack is also responsible for telehealth program support and co-ordination to insure that viable service and business models are developed and maintained for:

- Correctional Managed Care Program (\$400M clinical care operation)
- UTMB Hospitals and Clinics (\$1.3B clinical care, research, and education operation)
- Galveston/Houston regional communities
- Rural communities
- Large underserved “special” populations (urban, seniors, CHIP, Medicaid, Medicare)
- Large-scale Corporate/Industrial/Service organization applications.

He also serves as an adjunct associate professor of health informatics, University of Alabama at Birmingham and a credentialed case reviewer for Medical Care Management Corporation
